Phishing/Vishing/Smishing

South Side Bank would like to remind everyone to not under any circumstances give out your personal financial information to anyone who texts, calls, or emails you.

These texts, calls, and emails sound very legitimate and usually warn you of a problem requiring your immediate attention, such as your debit card has been deactivated and to call back to have it reactivated. At that point they will ask you for confidential personal information such as your card number and PIN – do not return the call. South Side Bank will never ask for personal or confidential information in these manners. If you believe you have been scammed, call the number on the back of your debit card immediately.
